EZVIZ 30/60 Mounting Bracket

Install Anywhere. Angle It Your Way.

Give your camera the freedom to go anywhere and see everything — at the door, around the corner, or out in the garden. Flexible mounting and adjustable angles mean you decide exactly where to watch, and how.

Flexible Installation

Install Freely, Wherever It Fits

The dual-axis folding base adapts securely to flat walls, corners, and round poles. From a doorway corner to a garden post, it helps you place your camera where protection is needed—not only where installation is easiest.

Flexible Viewing

Find the Right View with Ease

A 360° metal ball head gives you the freedom to position your camera in any direction. Tilt, turn, and fine-tune the angle until your key area is clearly in view.

360°

Rotatable Ball Joint

Multi-Angle Adjustment
