Upgrades Your Battery-Powered All-Day Recording

Unlike typical battery cameras that struggle to compromise either recording performance or battery life, this camera features EZVIZ's groundbreaking AOV technology.

WITH AOV

Human Detected

Human Detected

WITHOUT AOV

No Event = No Recording

Why EZVIZ AOV helps?

Wider Longer Detection Range

To see and respond to any activity earlier

Wiser Power Consumption

To adjust recording intervals automatically based on battery power conditions

AI-Powered Human Shape & Vehicle Detection

Stays Informed With Smart Alerts For Free

The camera cuts through hours of footages by telling the difference between people, vehicles, and everyday motion. Instead of babysitting the live view, your camera will flag the crucial times and notify you on the EZVIZ App.

Customizable Detection Zones

Accurate Detection Alerts

Auto-Zoom Tracking

Keeps What Matters In Sharp Focus With Auto Zoom

With auto-zoom tracking, the camera doesn't make important moments slip out of frame. When the camera detects human movement, it automatically pans to stay locked on the action and zooms in for a closer look.

Smart Color Night Vision

Lights Up Your Night With Bright Colors

Say goodbye to blurry, washed-out night footage. Powered by built-in spotlights, the CB8 Lite brings the night to life with vivid, full-color clarity, even in near-total darkness.

- 1 Use of this feature requires that a compatible local storage card (sold separately) be inserted into the camera.
- 2 The solar panel is not included in the kit. Product compatibility should be verified prior to purchase.
- 3 A compatible local storage card must be purchased separately. Cloud storage services are available only in selected markets; availability should be verified prior to purchase.
- 4 When AOV mode is enabled, EZVIZ Lab testing conducted under standard conditions indicates that the camera can detect motion at distances of up to 25 m in daylight and up to 12 m at night. Under the same test conditions, other battery-powered models using PIR-based detection typically provide a detection distance of up to 9 m. Actual detection performance may vary due to environmental conditions and installation factors.
- 5 Based on EZVIZ Lab testing conducted under standard conditions, the CB8 Lite provides a battery life of 95 days in standard PIR-triggered mode, assuming 5 minutes of camera activity per day. Under the same test conditions, the CB8 Lite provides a battery life of 15 days when AOV mode is enabled with the automatic interval setting. Actual battery performance may vary due to environmental conditions and usage patterns, including event frequency, recording duration, and live viewing.
- 6 Data from EZVIZ Lab's test results, under the following standard condition: AM=1.5 , 25°C, 1000W/m² and SMQ. The results are obtained based with the camera operating in AOV mode and the AOV interval set to AUTO. Actual charging efficiency may vary depending on sunlight intensity and other environmental conditions. Actual camera operating hours may also differ based on usage patterns, activity frequency, and environmental factors.
- 7 Based on EZVIZ Lab testing conducted under standard conditions. Video compression efficiency may vary depending on scene complexity, motion frequency, lighting conditions, and other environmental factors.
