Auto-Switching 4G & Wi-Fi Connectivity

Stay Connected, Anywhere You Set Up

01 Keeps it online with Wi-Fi and 4G

When Wi-Fi drops, the camera keeps going. It automatically switches to 4G to keep you connected, then returns to Wi-Fi once the signal is back — helping you stay protected without lifting a finger or wasting mobile data.

Please note that 4G connectivity requires a Nano SIM card and an active cellular data plan.

02 Set it up anywhere with Wi-Fi or 4G

Set it up where ordinary cameras may struggle — beside a quiet cabin, inside a busy warehouse, at a weekend exhibition, or around an active construction site. With 4G ready to step in, security can follow you far beyond the reach of everyday Wi-Fi.

Crystal-Clear 3K+ Resolution

Captures Every Moment in Crisp 3K+ Detail

See your home the way you would in person, with 3K+ clarity that keeps every detail crisp, so nothing important slips by.

360° Panoramic Coverage

Covers Every Corner in 360° Panorama

With its smooth pan-tilt design, the camera delivers full 360° coverage,
sweeping across your entire space in one complete view with fewer blind spots.

Always-On Video Mode

Upgrades Your Battery-Powered All-Day Recording

Unlike typical battery cameras that struggle to compromise either recording performance or battery life, this camera features EZVIZ's groundbreaking AOV technology.

Human Detected

WITHOUT AOV

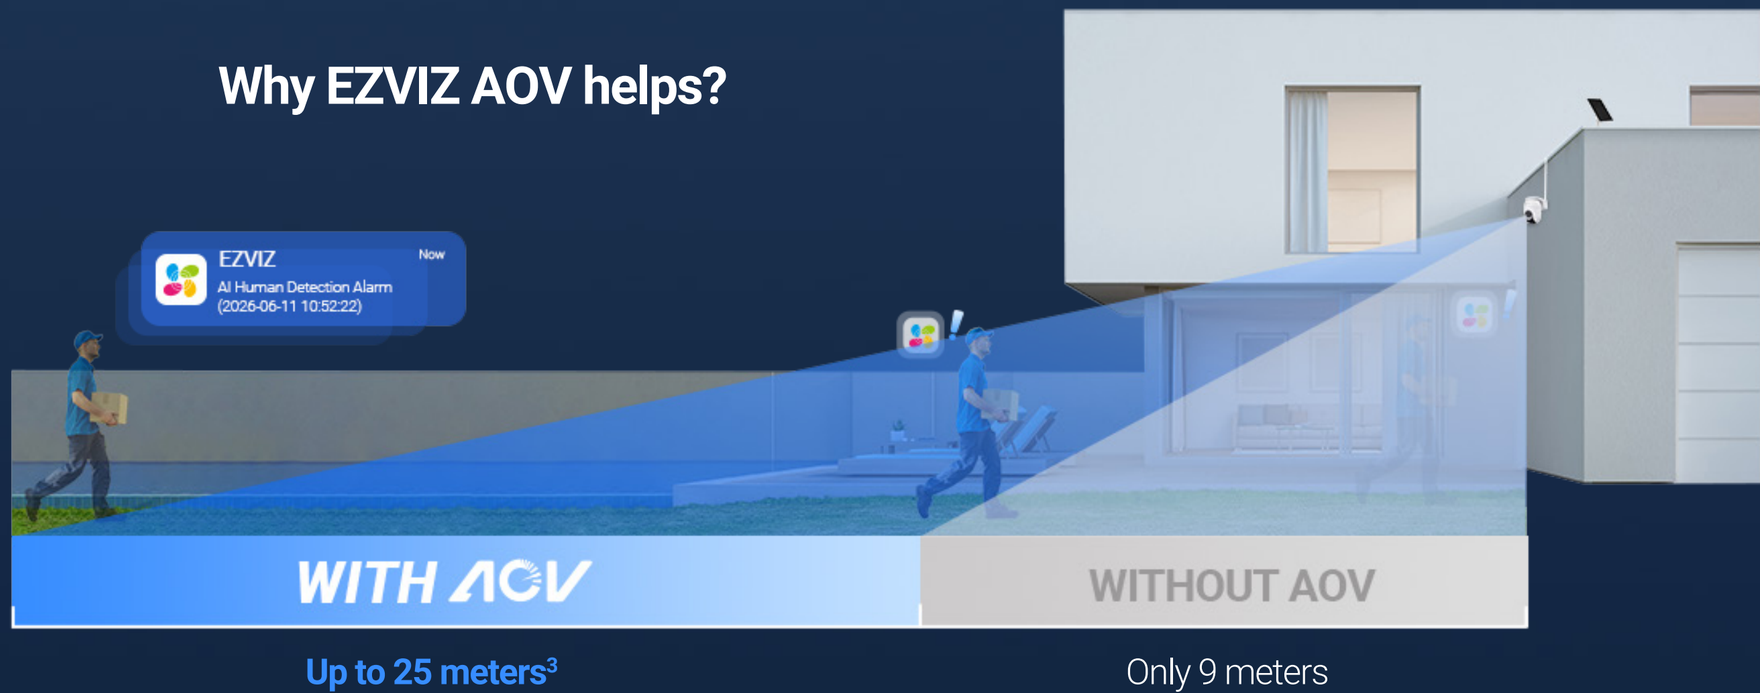

No Event = No Recording

Why EZVIZ AOV helps?

Wider Longer Detection Range

To see and respond to any activity earlier

Up to 25 meters[3]

Only 9 meters

Wiser Power Consumption

To adjust recording intervals automatically based on battery power conditions

AI-Powered Human Shape & Vehicle Detection

Stays Informed with Smart Alerts for Free

The camera cuts through hours of footages by telling the difference between people, vehicles, and everyday motion.
Instead of babysitting the live view, your camera will flag the crucial times and notify you on the EZVIZ App.

Customizable Detection Zones

Accurate Detection Alerts

Auto-Zoom Tracking

Keeps What Matters in Sharp Focus with Auto Zoom

With auto-zoom tracking, the camera doesn’t make important moments slip out of frame. When the camera detects human movement, it automatically pans to stay locked on the action and zooms in for a closer look.

Smart Color Night Vision

Lights Up Your Night with Bright Colors

Say goodbye to blurry, washed-out night footage. Powered by built-in spotlights,
the CB8 Lite brings the night to life with vivid, full-color clarity, even in near-total darkness.

2 Spotlights | Full-Color Night Vision

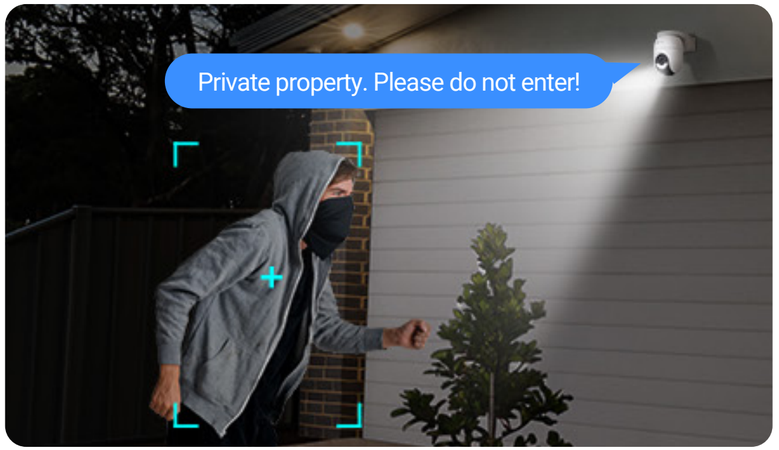

2 IR Lights | Black & White Night Vision

1 Use of this feature requires that a compatible local storage card (sold separately) be inserted into the camera.

2 A compatible local storage card must be purchased separately. Cloud storage services are available only in selected markets; availability should be verified prior to purchase.

3 When AOV mode is enabled, EZVIZ Lab testing conducted under standard conditions indicates that the camera can detect motion at distances of up to 25 m in daylight and up to 12 m at night. Under the same test conditions, other battery-powered models using PIR-based detection typically provide a detection distance of up to 9 m. Actual detection performance may vary due to environmental conditions and installation factors.

4 Data from EZVIZ Lab's test results, under the following standard condition: AM=1.5 , 25°C, 1000W/m² and SMQ. The results are obtained based with the camera operating in AOV mode and the AOV interval set to AUTO. Actual charging efficiency may vary depending on sunlight intensity and other environmental conditions. Actual camera operating hours may also differ based on usage patterns, activity frequency, and environmental factors.

5 Amazon Alexa and Google Assistant are not available in certain languages and countries.

6 Based on EZVIZ Lab testing conducted under standard conditions. Video compression efficiency may vary depending on scene complexity, motion frequency, lighting conditions, and other environmental factors.
